

what it is?

Grid of camera thumbnails

Market Size

Sensor evolution

Camera Retrospective

How it looks?

Images transition in and out

Probably transition based on time

Animated data points

ex. emulate dynamic range as well

Data on hover shows specific cam specs

Evolution of DigiCam

1998

Since the first digicam in 1975, becomes our lifestyle as consumer electronics

市場規模(金額)/Market size(Value)
普及期・コンデジブーム期を過ぎてなお、フィルム時代のおよそ2倍の市場規模。
CIPA 7

Explanation of how sensor evolved

- megapixels
- dynamic range (color)
- LCD / CMOS (on hover shows difference)

image selection

Average megapixels of the year
Max
Min

1.4 megapixels
62.5 megapixels

1996 → 2017

Is shot in

What new technology / designs / important camera is introduced this year?

eg. Canon SD Mark II
First 1080p video dslr 2008

eg. Kyocera entered the biz in 2000 and quited in 2004.

Cameras Released in < 2008 >

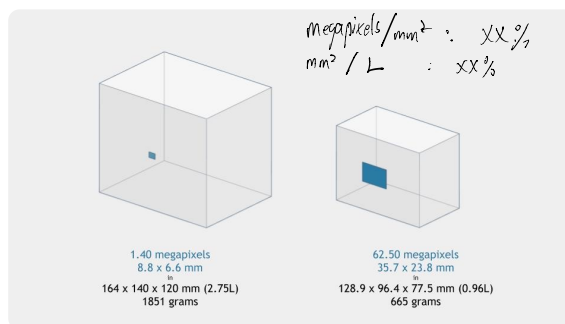

Interchangeable

Compact

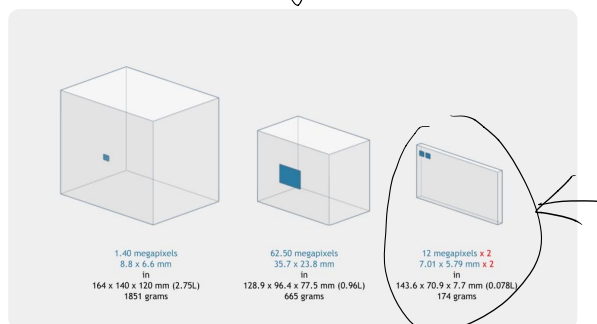

Canon
Nikon
